

How to disable driver signature enforcement in Windows 10

- a. Press the **Win + C** and click on **PC settings**.
- b. Switch over to the “**Update & recovery**” section.
- c. Then click on the **Recovery option** on the left hand side.
- d. Once selected, you will see an advanced startup section appear on the right hand side. You will need to click on the “**Restart now**” button.
- e. Once your Computer has rebooted you will need to choose the **Troubleshoot** option.
- f. Then head into **Advanced options**.
- g. Then **Startup Settings**.
- h. Since we are modifying boot time configuration settings, you will need to restart your computer one last time.
- l. Here you will be given a list of startup settings that you can change. The one we are looking for is “**Disable driver signature enforcement**”. To choose the setting, you will need to press the **F7** key.
