

## BestCode's Series 8. Next generation marking and coding.

High speed. Non-contact. 5-Year Warranty. Continuous ink jet printing systems.

BestCode Industrial Marking and Coding Systems print best by, lot code, sell by, expiration codes and other identifying marks and codes on industrial and consumer goods to ensure product traceability.

- Designed for basic applications printing 1 or 2 lines of text, barcodes and graphics. Typical applications mark and code 1 or 2 shifts per day, 5 days per week 2,000 to 4,000 hour annual operation..
- Designed for high speed applications printing 1, 2, or 3 lines of text, barcode and graphics. Typical applications mark and code 1 or 2 shifts per day, 5 days per week 3,000 to 5,000 hour annual operation, with high speed production line speeds.
- Designed for high speed / high use applications, printing 1, 2, 3, 4 or 5 lines of text, barcode and graphics. Typical applications mark and code 2-3 shifts per day, 5-7 days per week 6,000 to 9,000 hour annual operation, with higher speed production line speeds.
- Model 88S Specialized Solution systems is a complete range of printing systems for unique applications and industries. These include the Model 88S Extreme, Model 88S Food Grade, Model 88S High Speed, Model 88S High Speed One, Model 88S Opaque, Model 88S Opaque High Speed, Model 88S Micro. See specific datasheets for more information.

1 minute
Ready to print

**Ink range.** A range of quick to immediate dry inks have been developed for use with Series 8 printing systems. Inks available include MEK, Acetone, Ethanol, and Acetone/ Ethanol blend based inks. Multiple colors are available and a number of specialty fluids for unique applications.

Color LCD Touch Interface

# best Code

### Clearer and simpler to operate.

A large, 10.4" Color Touch Display is employed to allow easy visualization of all operating information. Operating functions are large, intuitive iconbased buttons, making full use of color as status indicators. This WYSIWYG environment provides the most realistic view of creating your print

message. Using "drag and drop" field based message, a graphical screen provides exacting location of your message format.

BestCode products are designed for the global market. Systems use multi-national character sets, featuring multiple languages and Unicode character printing – over 60,000 characters.

Smart Fill completely so you can print every drop. **Bottles** drain

External fill fluid addition allows on-the-fly ink and solvent filling without opening the enclosure. The large, clean, mistakeproof intelligent one quart fluid containers are sized differently eliminating the risk of adding solvent or ink into the wrong tank, while extending time between fluid additions. The quart ink and solvent bottles know their fluid type and shelf life.

#### LargeVolume<sup>™</sup> ink and solvent tanks.

High-volume, demanding print applications are achieved with minimal user intervention. Tanks hold multiple liters of fluids for extended run time. Ink tank volumes can operate multiple months between additions. Solvent tank volumes can operate 1000+ operational hours between additions.

Operational

EcoTec<sup>™</sup> fluid management system.

Reduces solvent consumption, lowering overall cost of ownership while extending the time between solvent additions and filter replacements.

EcoTec<sup>™</sup> is a proprietary ink tank, reduced cycle pump, SmartFilter<sup>™</sup> **SMART** and a twin trap vapor condensing unit purposely designed for CIJ Technology. The ink tank is designed to last the life of the system. The reduced-cycle pump extends pump life and lowers fluid operating temperature, resulting in lower evaporation rates.

Vapor condensing and reduced solvent evaporation lowers overall ownership cost and reduces interaction time adding solvent to the system. Filters know their install date, keeping track of usage and alerting you when the ink filter should be replaced. Quick change, extended life filters operate up to 10,000 hours – 12 months.

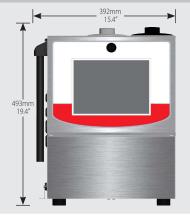

#### TempSense<sup>™</sup> ventilation.

Using automatic detection systems, variable fan speeds and highly efficient air flow, Temp-Sense<sup>™</sup> ensures the system operates in the correct temperature range. High-volume air filters operate 12 months between service intervals.
